[Sean O'Donnel](#)

[Senior Medical Director at GSK](#)

[Sean was senior to Juan Pablo but didn't manage Juan Pablo directly](#)
[February 2, 2024.](#)

I worked with Juan Pablo in the context of a high-profile phase 2 trial. We had a need for systematic review of complex efficacy-related outcomes. Juan Pablo worked with me to understand our need and then built a custom application for our needs. This output was very high-yield and allowed the team to be prepared for a key study readout. Subsequently, this tool was adapted to be used more broadly across our organization and has been highly impactful in successful delivery of clinical trials.

Juan Pablo's work developing this program was thoughtful, efficient, and very focused on our needs. He demonstrated creativity and an ability to process complex concepts that were outside his area of speciality. We often held calls where he was able to fix gaps in the tool in real-time. He always delivered as promised, often much more quickly and with more capability than we requested.

Juan Pablo is a great teammate and would be an asset to any company that hires him.

[Sandra Visser](#)

[Quantitative Medicine Leader | Effective and Inclusive Manager | Passionate about](#)
[Model-Informed Project Strategy and Decision-Making | President-Elect ASCPT](#)

[March 12, 2024.](#)

I had the privilege of collaborating with Juan Pablo on several projects where his expertise in complex dataflows, power BI dashboards, and R-Shiny visualization apps greatly contributed to our team's effectiveness.

Juan Pablo consistently demonstrated a deep understanding of all of the underlying databases and systems at GSK and effortlessly navigated through challenges to connect the right information sources with a great eye for end-user needs. His skilful development of visually appealing and user-friendly dashboards and R-shiny apps empowered our teams to extract actionable insights efficiently.

I highly recommend Juan Pablo for his exceptional technical skills, dedication, and collaborative spirit to any team that is looking to excel in data-driven environments.

[Rana Anjum](#)

[Senior Director, Clinical Sciences Program Lead - Oncology Clinical Development](#)
[at GSK](#)

[Rana worked with Juan Pablo but on different teams](#)

It is a pleasure to recommend Juan Pablo, who had greatly helped our team with the imaging tool he had developed. The EQUIP tool has transformed our approach to imaging data cleaning, which we used in our phase 3 study with 750 patients. This tool excels in identifying inconsistencies and auto-generating precise queries for specific issues within RECIST/iRECIST data, significantly saving time and enhancing accuracy. We eagerly anticipate the continued use of this innovative tool in our future projects. Juan Pablo's expertise in creating such a versatile system highlights his critical role in boosting our team's capabilities. Juan Pablo is highly innovative and will be a great addition to any team he joins.

[May 31, 2024.](#)

I had the good fortune of working on a study that implemented a clinical data consistency and accuracy tool developed by Juan Pablo. The study was a large phase III trial with registrational intent and the tool was designed to facilitate the medical review of tumor assessment data in accordance with RECIST v1.1. This tool transformed the process for this review and resulted in a much more efficient process, increased accuracy, and less time. In just over 2 years, this tool became the preferred system across the Oncology organization.

[Jasper van der AartJasper van der Aart](#)

[Director & Head of the Oncology Clinical Imaging group](#)

[Jasper was senior to Juan Pablo but didn't manage Juan Pablo directly](#)

[April 18, 2024.](#)

I had the pleasure of working alongside Juan Pablo, who has recently transitioned from our Clinical Imaging team. His expertise in swiftly crafting brilliant software solutions in Python and PowerBi for intricate clinical trial data challenges is truly remarkable. Juan possesses an exceptional knack for grasping the interconnections within data, particularly in amalgamating large clinical data sets to assess the impact on clinical trial endpoints.

One of his standout achievements was the development of a product streamlining data review processes, a solution that not only revolutionized our operations but also saved countless hours for many colleagues in the department. The impact of Juan Pablo's work on our business efficiency has been tremendous.

Throughout our collaboration, he consistently garnered rave reviews for his work, reflecting his dedication and proficiency. I wholeheartedly endorse Juan Pablo, and am confident that his talents will continue to drive transformative results wherever he goes.

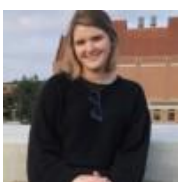

[Amanda McGillivray, PhD](#)

[Director, Clinical Development Interventional Oncology](#)

[Amanda worked with Juan Pablo but on different teams](#)

[February 5, 2024.](#)

Juan Pablo is a great addition to any team. I worked with Juan Pablo on a Phase III study evaluating the safety and efficacy of a PARP inhibitor in breast cancer. As part of this study, ctDNA was used as a selective biomarker to identify patients with molecular disease. As the study design was complex, Juan Pablo developed a bespoke data tracking tool to specifically interrogate disease recurrence versus molecular disease and was an incredibly useful and comprehensive tool. In addition to his work on the tracking tool, Juan Pablo identified key learnings from a clinical imaging perspective and provided solutions for the team and for future studies. Juan Pablo will bring great value to any team he joins. He is thoughtful, collaborative, insightful, and an absolute pleasure to work with.

[Grace Hinrichs](#)

[Clinical Data Manager at GSK.](#)

Juan Pablo was an invaluable addition to our team while working together on a high recruiting oncology clinical trial. He created a comprehensive tracker for patient's scan and disease progression data to guide data review and assist in data cleaning for the data management team and clinical imaging team. The tracker allowed us to track changes in patient's data and determine what areas might have data issues or what areas needed to be followed up on with sites. Juan Pablo was responsive to feedback and always on top of managing his system. He would be a great asset to any team.

[Angela Becker](#)

[Associate Director, Oncology Clinical Imaging](#)

[Angela worked with Juan Pablo on the same team](#)

[February 9, 2024.](#)

Juan Pablo and I have worked closely together for several years as teammates and I am sincerely grateful for having had this opportunity. Juan Pablo is a highly skilled data analyst and problem solver, and he truly enjoys helping others. He is collaborative, transparent, humble, and kind, and he continuously exceeds expectations. An experience that stands out to me started with Juan Pablo expressing interest in learning more about the operational type of support I frequently provide in my role. This quickly evolved to Juan Pablo offering his support and in a matter of days, he developed a tool with custom edit checks to enable cleaning of critical data. In addition to the remarkable value this provided for one study, it increased visibility for our team and Juan Pablo was quickly sought out for support on other projects. Simply working on the same team and being able to collaborate with Juan Pablo has been incredibly rewarding for me personally. I would highly recommend him for any position he has interest in and think that anyone who has an opportunity to work with Juan Pablo should jump on it!
